

**Inauguration of computer room for Common Integrated Police Application (CIPA) Project at -- District Gopalganj, Bihar on 6th March 2007**

Availability of relevant and timely information is of utmost necessity in conducting of daily business and activities by the police, particularly in crime investigation and detection of criminals. Police organizations everywhere have been handling a large amount of such information and huge volume of records. Information Technology (IT) can play a vital role in improving the functions of the Police organizations, by facilitating easy recording, faster retrieval and analysis of information. Quick and timely information that is made available about different facets of Police functions can bring in a sea change both in Crime & Criminals handling and related Operations, as well as improving the administrative processes in the organization.

Keeping this in view, the Gopalganj Police has stepped into forward mode with the Inauguration of computer room for Common Integrated Police Application (CIPA) Project by the District Magistrate on 6<sup>th</sup> of March 2007 at the Gopalganj Police Station, BIHAR.

The main objective of the Common Integrated Police Application (CIPA) project is to automate the processes (workflow) at primary source of information itself i.e. the police station and to build a Crime & Criminal Information System.

The Common Integrated Police Application (CIPA) was developed by National Informatics Centre (NIC) for planned induction of Information Technology towards better management of public order and criminal activities.

CIPA is targeted to be the comprehensive police station level Crime-Criminal data software. In the first phase the FIR registration process would be computerized and after familiarity in working with computers the staff would be gradually made to computerize further processes including investigation. For this purpose a TA ( Technical Assistant) will be appointed by the state NIC who will oversee the functioning for a period of 6 months. The process for the appointment has been initiated and the district is expecting to have the TA in a few days.

For Successful implementation of the project, District Level implementation committee has been constituted headed by district SP. Till the time the CIPA starts functioning the available

infrastructure of 5 latest desktops is being put to use by the enthusiastic members of the District Police force in learning the use of computers and a tie up with a local computer training institute has been informally made under which a trainer comes to the computer lab to teach the basics to a group of 10 persons per day.

The second phase of this project involving five more police stations is underway , the selected police stations being Kateya , Bhore , Mirganj , Kuchaikot and Barauli where funds have been received for site preparation. The rooms have been identified and necessary preparations are being made to install the computers shortly.
